

Be kind, be the solution. Help out in your neighborhood with TNR... learn more here...

Did you know that most stray and feral cats brought into shelters are euthanized because they're scared, frightened, in panic-mode which makes them unadoptable? Some have never known the touch of a human hand or had very little human contact before being abandoned. The sad truth is approximately 70% of all cats who enter shelters are euthanized. That number jumps close to 100% for feral cats, those never socialized with humans.

But there is help, there is an answer. TNR.

What is TNR? Trap-Neuter-Return (TNR) is the humane, caring, effective solution that benefits the cats and the community. Cats are Have-a-heart trapped, spayed or neutered, vaccinated, and eartipped (the universal symbol of a neutered and vaccinated cat), and returned to their outdoor home where a caretaker(s) provides food, water and shelter. Trap- Neuter-Return improves health, saves lives, and prevents endless litters of homeless kittens. Another benefit of TNR is that it stops the behaviors and stresses associated with mating. TNR is the humane, effective approach for feral cats benefiting both the community and outdoor cats. Project TNR <http://www.aplnj.org/tnr-spayneuter.php>

Monmouth County Shelter TNR Program, 260 Wall St., Eatontown, NJ #.732-542-3125 ***(DOGS TOO!)**

Spay Neuter Center of NJ 2094 State Route 35, Holmdel, NJ 07733 Cross Streets: Between Palmer Ave and Laurel Ave/S Laurel Ave (732) 796-0900 spayneuternewjersey.com

Being proactive and spaying or neutering can have a significant effect on the homeless animal population and can lead the way to less animals being euthanized on an annual basis.

You can make a difference and save lives. Together, we can educate people about feral cats—they don't belong in pounds and shelters. Spread the word that TNR is the humane, caring approach.
